Personal Financial Statements

Consolidated Financials

For The Year Ending December 31st, 2021

Overview

The Corporate Controller, external accountants, and management are responsible for the preparation and fair presentation of the financial statements in accordance with generally accepted accounting principles for designing, implementing, and maintaining internal controls relevant to the preparation of the financial statements. Personal financial statements of key members are included to show the financial strength of the backing of the company. The personal financial statements are not in accordance with GAAP and are for informational purposes only.

Platinum Team manages and owns membership interest in a portfolio of companies in many different industries ranging from land development to medical management and many more. The statements provided include companies that have activity during the fiscal year 2021. Some companies only own assets and have no P&L activity. Most of the land has been acquired by a contribution from a member of the entity in exchange for equity.

The companies have many intercompany transactions as they all play a role in the land development process from purchasing all the way through property management after buildings are finished.

Inventory

Inventory is in accordance with current industry standards and includes the cost of direct land acquisition, land development, construction, capitalized interest, real estate taxes, and direct overhead costs incurred during development and construction.

Big World Development

The Primary asset is a development tract in Baton Rouge, Louisiana. The \$120 million commercial tract is valued based on a \$80M certified appraisal of the land plus cost to date on development. Development has started and \$40 million has been expended for professional fees and infrastructure.

Platinum Neighbors Inc

Platinum Neighbors (PNI) manages medical practices and facilities. Currently, the main source of revenue comes from managing an assisted living facility and family practice clinic. The main asset is the land and buildings the facilities are on. The land is owned by Paramount which is owned by Platinum Neighbors. Paramount will also be purchasing a medical center in Wylie for \$12.7 million that will carry a note of \$9 million. The difference will be made up of members' contributions. Additionally, PNI owns a 30% interest in Crossroads Pharmacy which currently has one location but will be expanding into 3-5 in the next 12 months.

Daydra Management

Daydra's main source of revenue is construction and development fees associated with commercial land and buildings. Not only does Daydra handle all the intercompany construction and development, but they also do business with non-related parties. The \$3.5 million receivable for services in developing the Wylie medical center will be paid by Golden Harbor Ventures upon closing of the property. Paramount will be purchasing the Wylie Medical Center.

Rosemary & Root

Rosemary & Root is a food service company. Its main source of revenue was from providing food service to the Villa Asuncion assisted living facility. Since February 2021, as a result of the catastrophic ice storm, it has been temporary closed until the remodel has been completed at Platinum Senior Living (formerly Villa Asuncion). It will be branching out into other food services by occupying space in the Big World Developments.

The District

The District projects are comprised of three segments. Lifestyle, Lifestyle II, and Townhomes. The properties will be mixed use with townhomes, apartments, retail, medical, office space, and restaurants. \$36M in apartment buildings, \$2.5M in townhomes, and \$5.2M are already sold contingent on completion of the construction. Some tenants have already signed lease agreements and others are in negotiations.

Heritage Properties Brokerage

Heritage Properties Brokerage is a real estate brokerage firm specializing in helping clients through the entire commercial reality process. The main source of income is commissions from the closing of properties.

Other Projects

The Cotton Weave project has \$1.3M of equity consisting of \$408K in land and \$873K in improvements.

Notes to the Financial Statements

Note 1 – Strategy

The company's high-level strategy is to focus on building communities that are comprised of medical, multifamily, town homes, entertainment, hospitality, restaurants, retail, professional services, offices, education. All of this will be high density, themed together and cross marketed.

Note 2 – Location

The company has many projects currently developing but not closed. Locations include Texas, Oklahoma, Arkansas, California, Missouri, and Costa Rica.

Note 3 – Funding

Platinum has worked out funding and capital stacks for these projects where 50 to 60 percent of the project is paid by new market tax credits, federal programs, state programs, and local municipalities. These are all grants or forgiven incentive programs. 10 to 20 percent of the project funding comes from equity partners. Conventional financing is then acquired for 20 to 40 percent of the project.

Note 4 – Future Projects

It is estimated that Platinum Team has close to \$300M in additional equity of projects that are highly likely to close in the next 6-12 months.
